

(BS) EN 326-3: 2003

Wood-based Panels - Inspection of an isolated lot of panels

Part 3 specifies methods for verification of the compliance of one or more properties of wood-based panels with the requirements of the relevant EN standards.

If necessary, for panel production controlled in accordance with EN 326-2, this Part 3 may be used in cases of dispute.

Part 3 is not applicable for the factory production control. EN 326-2 is used for this.

Verification of compliance is based on the testing of small test pieces.
